

Goodfellow Announces Major Expansion of Their Range of PEEK Materials

Coraopolis, Pa ... December 11, 2018... Goodfellow is pleased to announce a major expansion of their range of polyetheretherketone (PEEK) materials. Now offering 12 different forms – film, sheet, fibre, monofilament, powder, granule, tube, rod, mesh, bolt, nut and washer – the company is able to meet application requirements in an extraordinarily wide range of industries.

Of special note is the addition of more semi-crystalline unfilled, mineral-filled, and black cosmetic grades of PEEK film along with a mineral-filled amorphous grade film. This is the result of an agreement Goodfellow has established with Victrex™, an innovative world leader in high-performance polymer solutions, to adopt the full range of Victrex Aptiv™ PEEK films in sample quantities. Featuring a thin film format and used in a wide variety of applications in the aerospace, automotive, electronics, energy, and manufacturing industries, versatile Aptiv PEEK films provide exceptional durability and reliability in demanding application environments.

PEEK is a high-performance engineering thermoplastic with excellent mechanical properties and chemical resistance across a broad temperature range. It also exhibits extremely high resistance to steam sterilisation, excellent radiation resistance, low outgassing under vacuum, and UL94 V-0 flammability rating.

For more information about these exciting additions to Goodfellow's line of PEEK materials, contact a Goodfellow polymer expert on 1-800-821-2870 or email info@goodfellowusa.com.

About Goodfellow

For more than 50 years, Goodfellow has been a leading supplier of metals, polymers, ceramics and other materials to meet the needs of science and industry worldwide. The company specializes in supplying small quantities (a few grams to a few kilos) of metals and materials for research, prototype development and specialized manufacturing applications. Standard products can be found online at the comprehensive [Goodfellow Catalog](#). Custom products and materials in larger quantities are available upon request at info@goodfellowusa.com.
